DECK

+ The added plus for my terrace:

- /// 0% wood, 0% WPC -
no trees have to die
- /// 100% natural beautiful look
and feel of wood
- /// Bare feet friendly: no splinters or cracking
- /// Extremely water-resistant & non-slip
- /// Resistant to seawater and chlorinated
water
- /// Contains no wood: no rotting
- /// Wide range of colours
- /// Made of  Resysta®
THE BETTER WOOD

For private or commercial applications, modern, and high quality decking board systems, made in Germany, impress with their natural and authentic look and feel. They are a sound investment for the future. In comparison to wood, the profiles, made of Resysta, are 100% water and UV-resistant, suitable for bare feet areas and resistant to fungus and insect infestation. Salamander decking boards are the perfect solution for wood-look water-resistant flooring in patio, pool or swimming bath areas, for example. The decking boards are available with a traditional ribbed surface structure or optionally with a modern, smooth profile surface. The boards can be supplied with or without rounded edges in 125 mm, 140 and 200 mm widths. The possibility of laying the decking very closely, gives the surface a particularly attractive appearance.

The material of the future

Salamander Outdoor Profiles made of Resysta outperform their natural role model - tropical timber - in almost every respect. As they contain no wooden components, the decking boards are particularly water-resistant. They do not splinter, swell or split, and are totally resistant to fungal and insect infestation. The material is very easy to keep clean, available in a wide range of shades and finishes and provides outstanding non-slip properties. But whether conventional or modern, a protective sealer, matched specially to the Salamander profiled surface, preserves the finish against dirt, wear and tearing or environmental effects. All of these properties make Salamander decking boards ideal for areas in which the material is exposed to extreme weather conditions or moisture.

Raw materials:

approx. 60% rice husk + approx. 22% rock salt + approx 18% mineral oil

DECKING PROFILE RE100

Version	Sanded, with groove
Surface	Ribbed/smooth
Width x height	125 x 22 mm

DECKING PROFILE RE103-0100

Version	Sanded, with groove
Surface	Smooth/smooth
	Rounded on one side
Width x height	140 x 20 mm

DECKING PROFILE RE103-0200

Version	Sanded, without groove
Surface	Smooth/smooth
	Rounded on one side
Width x height	140 x 20 mm

DECKING PROFILE RE104-0100

Version	Sanded, with groove
Surface	Smooth/smooth
	Rounded on one side
Width x height	200 x 20 mm

DECKING PROFILE RE104-0200

Version	Sanded, without groove
Surface	Smooth/smooth
	Rounded on one side
Width x height	200 x 20 mm
